ABOUT UNIVERSITY

Established in the year 1857, the University of Madras is the mother of almost all the universities of south India. In the last 159 years, this University has grown with strength while widening its teaching and research activities.

Recently the University by its quality education has been credited by National Assessment and Accreditation Council (NAAC) with the "A++" grade. The UGC has recognized the University as the first centre for potential for excellence in the country.

ABOUT THE DEPARTMENT

The Department of Geography has been the flag bearer of geographic science teaching and training ever since it was established in the year 1932.

The Department of geography is the national centre for advance study in GIS, Digital Image Processing and Data Management. The digital cartography laboratory was established under Water- Loo University and the program was funded by CIDA The Department is also supported by Common Wealth Commission, UK for offering P.G programme on sustainable development with Staffordshire University, UK during 2004-2007. The Geomatics laboratory has been developed under Special Assistance Program of UGC and DST FIST programme of the Department. The Department has conducted various short term programmes on GIS, Remote Sensing & GPS.

The Department offers post graduate degree courses in Spatial Information Technology and Applied Geography and M.Tech. Geoinformatics. The Department is involved in developing curriculum and teaching M.Sc. Geography under distance education mode.

The Department also offers three international online post graduate courses on Sustainability, Natural Resource Management and Sustainable Development for Urban Environments (with Staffordshire University, UK).

YOUTH EMPOWERMENT FOR EPIDEMIC AND NATURAL DISASTER MANAGEMENT

ABOUT THE CONFERENCE

The International Conference on 'Youth Empowerment for Epidemic and Natural Disaster Management aims to invite pioneering action-oriented solutions seeking geospatial research to the complete analysis of such issues with a precise focus on reclamation and sustainability. In an era marked by increasing challenges posed by epidemics and disasters, it is imperative to recognize the vital role that youth play in building resilient communities. This conference aims to shed light on the potential, creativity, and determination of young individuals in mitigating and responding to the risks associated with epidemics and disasters.

As we confront the complexities of a changing climate and a world interconnected by global health threats, the energy and innovative spirit of youth are invaluable assets in our collective efforts to reduce risk and build a safer, more sustainable future

THREE DAYS INTERNATIONAL CONFERENCE On YOUTH EMPOWERMENT FOR EPIDEMIC AND NATURAL DISASTER MANAGEMENT

Thiru Anbil Mahes Poyamozhi

Minister for School Education, Government of Tamil Nadu

I welcome you all for the three-day international conference on Youth Empowerment for Academic and National Disaster Management, organized by the University of Madras Department of Geography and Indian universities and institutions network for disaster risk reduction, National Institute of Disaster Management. This conference is for you to know that in order to create awareness and pass on knowledge and responsibility for the future generations. As per United Nations Office for Disaster Risk Reduction Department have said on the survey report of 2019 that major disaster's occurring areas are America, China and India. When we face with the natural disasters, we should think of how we get rid of it and safeguard everyone and not be selfish to ourselves. I am proud of being part of this Conference and based on your reports what are key learnings I could learn and how it can be implemented on school levels. So, Thanking you for inviting me to Inaugural day of the Three day international conference.

Prof. S. Elumalai
Hon'ble Registrar
University of Madras

Very good morning to everyone and I welcome all the Guests, staffs, and my dear students.

And I'm very happy that the Department of Geography of our university is conducting an International Conference in the theme of Youth empowerment for epidemic and natural disaster management. As it is the "Need of the world" to discuss and generate ideas of how to tackle and protect ourselves from disasters and epidemics which are we facing in the current scenario. And it is us who should be self-disciplined and self-taught.

And I'm wishing the entire team for conducting this international conference on behalf of the University and I am thanking all the participants and faculties who are attending this event.

It is difficult to organize a small training program. we would have organized 20-35 people's training program in Australia and in Nepal, and we know how difficult it is. But Sanjeev Prasad, he is smiling all the time and he's running here and here and today after one or two hours will be reduced I'm sure. So, this is a very good experience for him and his team. Maybe in future also you can arrange this kind of conferences and training programs, because the result, the outcome of such conferences will be very useful, particularly to the young researchers and even to the faculties and it will be useful for the country as a whole. So, this is very good for students and because students are the future staff, future leaders and future academician. So, I think it will be useful for students at this university and for the students from other university as well.
